

VANNES WASHBASIN

White

052344

PRODUCT DESCRIPTION

The VANNES washbasin is a piece of equipment adapted for people with reduced mobility (PRM) ideal for collective spaces, combining design and functionality.

It is made of composite material, a mixture of mineral powder and synthetic resin with a gel-coat coating, guaranteeing high durability and ease of maintenance.

It has 2 handles to hold on or get closer (for people in wheelchairs).

This washbasin is available with or without an overflow and can be delivered with a central hole for the taps or without a hole, depending on your preferences (to be defined when ordering).

It is sold without taps or drain drains, giving you the freedom to choose the accessories that suit your needs and style.
